

A glass jar filled with white yogurt, topped with granola, blueberries, and raspberries, garnished with fresh mint leaves. The jar is placed on a dark wooden surface, surrounded by scattered berries and granola. The background is a blurred wooden surface with more berries and granola.

Ampco Pumps Company

SANITARY PUMPS

Video Tour

Ampco Pumps Company has been providing quality pumps to sanitary, marine and industrial markets worldwide for more than 60 years. Based on our commitment to deliver quality products, excellent customer service and competitive pricing to our customers, we have become the preferred pump provider for some of the most recognized companies in the world.

In 1995 Ampco Pumps Company came under new ownership and shifted its direction to develop product advantages for the sanitary pump industry. That shift in focus has resulted in tremendous growth over the past 20 years.

Ampco Pumps Company's corporate headquarters, manufacturing, and assembly facility is located in Glendale, Wisconsin. Additional facilities include; pump re-manufacturing center – Milwaukee, Wisconsin as well as a sales and assembly facility – Herxheim, Germany.

By redefining engineered excellence, Ampco offers the most complete line of pumps, blenders and mixers in the industry.

We invite you to visit our facility in person and allow Ampco to show you how we engineer and manufacture the best sanitary pumps in the world!

Ampco Advantage

Ampco Pumps Company offers the most complete line of sanitary centrifugal pumps, positive displacement pumps, dry blenders and powder mixers in the industry. Providing pumps for the sanitary, marine and industrial markets worldwide since 1948, Ampco provides highly engineered advancements, many standard material upgrades, and the best delivery times in the industry.

Significant material upgrades are included in Ampco's competitive pricing, including a stainless steel gearcase on each new positive displacement pump. Ampco keeps a large inventory supply to ensure prompt deliveries; standard pumps are built and shipped within two weeks of ordering. All pumps are tested to customer specifications prior to shipment.

Products and Services

- **Complete line of sanitary centrifugal pumps:**
AC/AC+ Series/L Series/LME Series/M Series/
and SP Series
- **Complete line of positive displacement pumps:**
ZP Series/AL Series/QTS Series
- **Brewery & Cellar Products:**
Cellar Cart for Beer & CIP/Wine & Must Cart/CB+
Craft Brew Pump/ROLEC DH Hop Induction System
- **Complete line of centrifugal industrial pumps:**
K Series/R Series/Z Series/IC+/D Series
- **Remanufacturing and Premium Economy pumps (PE)**

Ampco Applied Products has a complete line of custom dry blending and powder mixing equipment. The in-house engineering team works with users to build custom products that are best suited for each application.

Products offered

- **Complete line of blenders and mixers:**
AC+ Dry Blender/PM Powder Mixer/PI Powder
Inducer/SB SBH SBI Shear Blenders

All of Ampco's products are manufactured, assembled and tested in our newly expanded 64,000 square foot facility in Glendale, Wisconsin. The remanufacturing center, located in Milwaukee, Wisconsin, turns around completely remanufactured pumps to "as new" performance and appearance within two weeks. All completely remanufactured pumps include performance testing and a full one-year factory warranty.

Ampco Pumps Company,
"redefining engineered excellence"

The designs of competing pumps have not changed in decades. When material upgrades aren't sufficient, we innovate: The patented ZP3 and patented ZP1+; AC+ centrifugal pumps; LH close-coupled, and high pressure centrifugal pumps are all examples of the Ampco Advantage. We invite you to see for yourself why Ampco Pumps Company is truly the best sanitary pump manufacturer in the world.

SANITARY PUMPS

Ampco's complete line of sanitary positive displacement pumps and centrifugal pumps offer design innovations and value added features as a standard while the competition charges additional for many of these upgrades. Ampco offers all of these benefits and maintains 100% interchangeability, both hydraulically and dimensionally with competing pumps.

Ampco's patent-pending ZP Series positive displacement pumps offer a 304 stainless steel gearcase -standard, no more rust or paint flakes on the processing room floor. The ZP3 Series offers a front-loading seal

design that reduces maintenance downtime and is fully CIP-able. The patented ZP1+ innovation offers the ability to replace o-rings without disconnecting the pump from the piping system. All of the ZP Series design advantages lead to reduced maintenance times and a faster ROI.

Ampco centrifugal pump advantages include the first significant improvement in the "Traditional C Series" style pump with our improved shaft design of the Ampco AC+. The clamped stub shaft and threaded impeller nut provide a more stable performance than the original C Series design. L Series pumps include material upgrades and design improvements of the LF seal design.

CENTRIFUGAL PUMP APPLICATIONS INCLUDE:

- Fruit juice
- Mash
- Wine
- Beer
- Soap
- Lotions
- Buttermilk
- Salad Oil
- Mouthwash
- Pharmaceuticals
- Biotech

POSITIVE DISPLACEMENT PUMP APPLICATIONS INCLUDE:

- Dough
- Fats
- Icing
- Cocoa Butter
- Potato Salad
- Relish
- Stews
- Butter
- Yogurt
- Pet Foods
- Sausage Meat
- Auto Paints
- Inks
- Latex

REMANUFACTURED PUMPS

Ampco's remanufacturing program has earned an excellent reputation for quality and delivery since its introduction in 2010. The centralized location minimizes shipping time and expense. Ampco's focused remanufacturing process offers a two-week turnaround time, from customer approval to completion. Remanufacturing will restore your ZP-style pump (models ranging from the 06 to the 320) to its original performance and efficiency and offers significant cost savings. Remanufactured pumps include all standard Ampco upgrades (except a stainless steel gear case), are performance tested before shipment and carry a full one-year factory warranty.
